

FOR IMMEDIATE RELEASE

N. Joel Walter
President
(740) 654.8227

Lancaster, Ohio, 6/26/2006 N.J.W. Construction is pleased to announce that N. Joel Walter has recently achieved the prestigious Certified Remodeler status.

A Certified Remodeler (CR) designation proves the remodeling contractor's superior knowledge, technical comprehension and skill in remodeling.

Nari's CR program measures skill and expertise valued not only by other professional remodelers, but by consumers as well. Highly respected by those who have achieved the designation, the CR program identifies professional remodelers who have undergone comprehensive review and testing in areas of business management, ethical conduct, and technical skills. In addition, they must also adhere to NARI's strict Standards of Practice and Code of Ethics. The NARI certification program assesses the knowledge and skills of the remodeler in over 20 remodeling task areas including business methods and practices, building codes and construction law, planning and building site layout, and all trades skills required in remodeling your home. Attaining this certification requires the candidate to have been working full time in the remodeling field for at least 5 years and passing a comprehensive assessment exam. Preparation for this exam takes up to 16 weeks of intensive study and self-examination. In addition Certified Remodelers are bound to abide by the NARI Code of Ethics and the NARI Standards of Practice.

In speaking with Mr. Walter, he commented on being a certified remodeler and what it will do for his business, "consumers will be confident in knowing that their contractor is set by guidelines and standard practices that ensure the quality in every project that N.J.W. does."

To prepare for the Certified Remodeler certification, remodelers are asked to complete a qualification form, which outlines the background of their experience and education in remodeling, and are given a study guide and a business management book. Nari also offers study groups to prepare them for the written examination, which tests for knowledge in Computer Aided Design (CAD), materials selection, layout standards, installations processes, and trade guidelines. It enriches the professional's understanding and maximizes performance during any remodeling project.

N.J.W.'s goals for their customers and perspective clients is the ability of the company to give the client exemplary support, whether a small project or a custom new build, N.J.W. has established distinct standards to set them apart from the competition, from the company's honest reputation to their attention they give to every phase of the clients' projects. The company prides itself with the relationships they build with their clients before, during and long after the construction has been completed.

N.J.W. Construction is a full service custom residential builder with in house 3-D designs services available. 2590 Kull Rd. Lancaster, phone 654.8227 website: njwconstruction.com.
